

Lab manager position in the Hutchinson Lab at Northeastern University

The Hutchinson Lab of Cognitive Neuroscience at Northeastern University (www.northeastern.edu/hutchinsonlab/) is looking to hire a full-time lab manager/research assistant starting this summer (flexible start date between 6/1 and 8/1). The lab is interested in how memory influences, and is influenced by, selective attention with a focus on using behavioral and neuroimaging techniques (e.g. fMRI).

Responsibilities:

Responsibilities include: 1) day-to-day management of the lab and assisting the PI with administrative matters (e.g. IRB protocols, maintaining participant records), 2) assisting other lab members with behavioral and neuroimaging research projects (e.g., collecting and analyzing data) as the need arises, and 3) independently conducting a behavioral or neuroimaging research project. The training and experience offered by the position is ideal for those anticipating future application to research-focused graduate programs.

Qualifications:

Applicants should possess a BA or BS degree in psychology, neuroscience, computer science, or a related field by the time of employment and be eligible to work in the United States. Strong organizational and interpersonal skills are a must as well as experience or coursework in statistics and/or behavioral research. Proficiency with standard office applications (e.g. Word, Excel, or equivalents) and common operating systems (OS X and Windows) is required. Prior experience with programming (MATLAB, Python, R) and Linux-based operating systems is not required, but strongly desirable.

The position is for a minimum of one year with a two-year or more commitment preferable.

If interested, please send along a copy of your CV as well as a brief description of your qualifications and research interests to Dr. J. Benjamin Hutchinson (b.hutchinson@northeastern.edu).
